

Water Turn – On and Inspection requires 2 days notice. Call ahead for an appointment. 203-879-8141

Recommendation: A pressure reducing valve and/or water expansion tank may need to be installed. Check with your plumber.

## Water Connection Cost Sheet

**Connection Fee - \$ 700.00 (Residential) / \$ 2,200.00 (Commercial or Industrial)**

(This purpose of this charge is to collect a fair contribution from the applicant towards the cost of the utility system previously paid by existing customers.)

**Permit Fee - \$ 100.00**

***Pay by check to Wolcott Water Dept.***

**Meter Set-up - \$515.36 (and up depending on meter size)**

Includes:

- 5/8 x 3/4 meter w/touch pad
  - Flush line until water runs clear to avoid meter damage
  - If any grit is left in the lateral after installation, the meter will break and will not be covered under warranty. Repair and material costs will be billed to the homeowner.
- connector
- check valve
- ball valve
- close nipple
- wire
- radio read component – to be installed by Wolcott Water Dept

***Pay by separate check to Wolcott Water Dept.***

Water bills are generated quarterly and include a “Basic Service Charge” and a “Usage Charge”. The Basic Service Charge helps to cover certain fixed costs such as meter reading, testing, replacement, bill preparation, bill processing, operational costs, etc. and is applied even if there is no consumption at a premise during a particular billing period. The Usage Charge is determined by the amount of water used in hundred cubic feet. A one time “Service Turn On” fee in the amount of \$50.00 is also applied to your first bill. Please refer to the Water Rate Schedule printed on the backside of the water bill for further information.
